

THE CAMBRIDGE *green*
CHALLENGE

**Christmas
Shutdown is
coming...**

THE CAMBRIDGE *green*
CHALLENGE

**Ho-Ho-Hope
you're ready to
unplug equipment
for Christmas!**

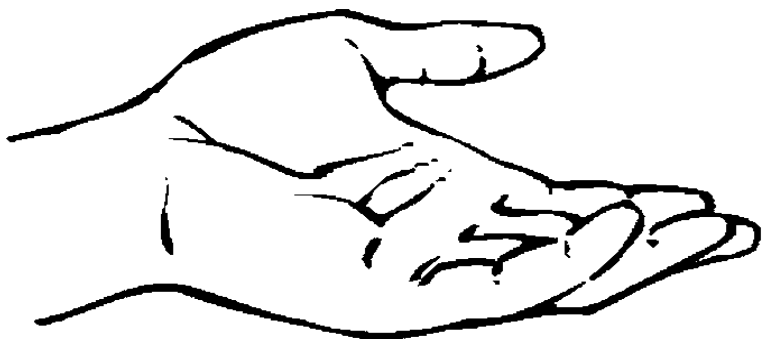

THE CAMBRIDGE *green* CHALLENGE

The University uses over
£30 of electricity per
minute.

Doesn't sound too bad?

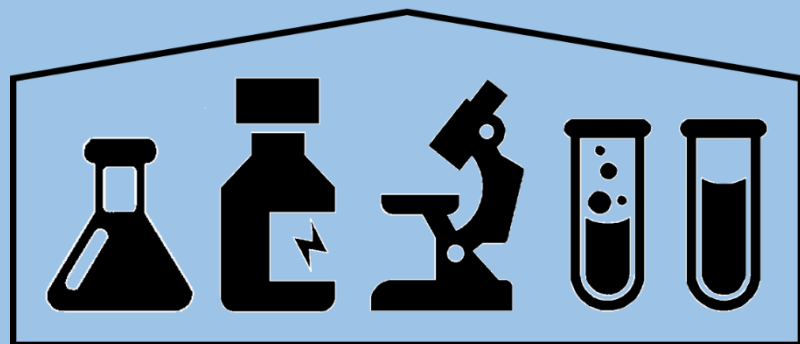

That will be £16 million
a year then, please!

THE CAMBRIDGE *green* CHALLENGE

In our labs we use more
electricity per person
than an entire average UK
household!

Which equipment could you
use more responsibly?

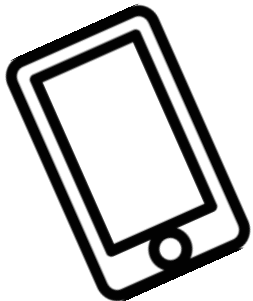

THE CAMBRIDGE *green*
CHALLENGE

The energy a microscope light engine wastes if left on overnight would power your smart phone for 2 years.

It's worth checking before you leave!

THE CAMBRIDGE *green*
CHALLENGE

Electric heaters can produce twice as much greenhouse gas as central heating.

Get Facilities to check and bleed your radiator instead.
